

Bodzsár, É.B., Susanne, C. (2004, Eds) *Physique and Body Composition - Variability and Sources of Variation*. EAA Biennial Books, 3. Eötvös University Press, Budapest. pp. 181. ISBN 963 463 7027

Susanne, C., Bodzsár, É.B.: On physique and body composition.	9–40
Claessens, A.L., Lefevre, J., Philippaerts, R., Thomis, M., Beunen, G.: Relation between body composition and Heath–Carter somatotype in adult males.	41–51
Jaeger, U., Zellner, K., Kromeyer-Hauschild, K.: Body composition and type of body shape in schoolchildren from Jena/Germany.	53–64
Tan, S.K., Pena Reye, M.E., Malina, R.M.: Somatotypes of rural and urban children in Southern Mexico.	65–76
Tomazo-Ravnik, T., Kalan, N.: Anthropometrical characteristics, body composition and somatotype of elite swimmers at the age of 10, 12 and 14 years.	77–86
Salces, I., Susanne, C., Rebato, E.: Familial correlations in body fatness indicators in the Biscay population.	87–97
Buffa, R., Marini, R., Floris, G.: Bioelectrical impedance vector analysis (BIVA) in the Sardinian population.	99–109
Kirchengast, S.: Proximate and ultimate aspects of body composition changes during menopausal transition.	111–119
Zerbo-Šporin, D., Štefančič, M.: Body fatness and fat distribution in female university students.	121–130
Satake, T.: Variation in BMI in physically active and non-active Japanese university students.	131–137
Gyenis, G., Pásztor, Zs.Sz., Hidegh, A.H.: Prevalence of overweight and obesity assessed by the body mass index in the schoolchildren of the third Erd Growth Study.	139–148
Cole, T.J., Roede, M.J.: A baseline to monitor international secular trends in obesity. Centiles of body mass index for Dutch children aged 0–20 years in 1980.	149–155
Bláha, P., Vignerová, J.: Longterm observations of body parameters of Czech children and adolescents.	157–172
Schweich, M., Knüsel, C.J.: Physical variation in past populations.	173–181
